INFORMED CONSENT TO CHIROPRACTIC CARE

THE NATURE OF CHIROPRACTIC TREATMENT: The doctor will use his/her hands to move your joints. You will typically feel and hear the movement of the joints similar to popping your knuckles. Therapeutic ice may be used.

POSSIBLE RISKS: You may feel tired after your first adjustment. You may feel sore like you "used muscles you didn't know you had" like after your first workout at a gym. A very small percentage of people may feel pain, tingling, numbness, cramps or tightness in their extremities. There is a one in one million to one in ten million chance of stroke associated with certain types of cervical (neck) manipulation. We do not employ that type of procedure in our office. The risks of complications due to chiropractic care have been described as "rare".

OTHER TREATMENT OPTIONS: Other treatment options which could be considered may include the following:

-Over-the-counter analgesics: The risks of these medications include irritation to the stomach, bleeding ulcers, liver and kidney damage, heart attacks, and other side effects in a significant number of cases.

-Medical Care: including prescribed anti-inflammatory drugs, tranquilizers, and analgesics. Risks of these drugs include a multitude of undesirable side effects and patient dependence in a significant number of cases.

-Hospitalization: in conjunction with medical care adds risk of exposure to virulent communicable disease occurs in a significant number of cases.

-Surgery: in conjunction with medical care adds risk of adverse reaction to anesthesia, as well as an extended convalescent period in a significant number of cases.

Risk of Remaining Untreated: Delay of treatment allows formation of adhesions, scar tissue and other degenerative changes. These changes can further reduce skeletal mobility, and include chronic pain cycles.

By signing below, I agree to the following: I have read the explanation above. I will have had the opportunity to have any questions answered to my satisfaction before beginning treatment. I have fully evaluated the risks and benefits of undergoing treatment. I have freely decided to undergo treatment, and hereby give my full consent to treatment.
